Engineered Performance & Purity

KIMBERLY-CLARK PROFESSIONAL* has long been recognized for the development of technologically advanced products which are consistent and reliable. Each product is manufactured using rigorous process controls and sampling plans to ensure lot consistency, from raw materials through processing. This ensures that our full line of high-quality products performs at the required level for your environment: cleanrooms, laboratories or clean manufacturing facilities.

You can count on KIMTECH PURE* products for the cleanroom to protect against particulates and other contaminants. Our products offer lab-quality performance that also meet the rigors of clean manufacturing.

KIMBERLY-CLARK PROFESSIONAL* delivers convenience, reliability and technical expertise in a single source for all your glove, mask, wiper and apparel needs.

Quality Assured

Since there is no room for error in the cleanroom, we engineer and manufacture our cleanroom products to the most exacting quality standards.

Each lot is tested and verified to meet stringent specifications for particulate and extractable levels before being released. Rest assured that the quality of our cleanroom products are constantly reviewed through certification, independent testing, and most importantly, customer satisfaction.

Our Certified Quality documentation ensures that you will always receive quality products that you specify. Visit www.kimtech.com/certificates to view certificates.

Certificates of Analysis (COA) provide a monthly snapshot of product quality. Available on all KIMTECH PURE* Sterile and Non-sterile Gloves, each COA summarizes the performance of a lot with regard to physical properties and cleanliness. Liquid particle counts are reported for the different particle size ranges and extractables are reported by weight and surface area.

Certificates of Conformance (COC) verify that a specific product lot conforms to all specifications before the lot is released, and are available on KIMTECH PURE* Wipers and Apparel. Physical characteristics are tested in accordance with ASTM standards. Particles and extractables are tested in accordance with IEST standards.

Certificates of Irradiation (COI) document the minimum and maximum dosage of irradiation that a product received, and are available for all sterile products. Sterilization validation documentation confirms that the doses have been verified, the loading patterns are sufficient, and that the process is audited on a regular basis.

KIMTECH PURE* and KIMBERLY-CLARK* Gloves

Product Advantages

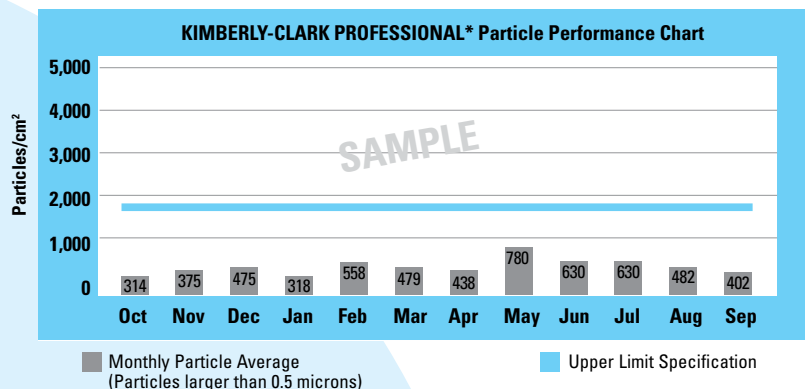

Gloves that protect you and your work

Since scientific work is performed by hand, the right glove is often the most critical element in worker and process protection.

Whether you need hand protection for a delicate lab procedure or for an ISO Class 3 cleanroom, our outstanding glove line provides the consistent level of quality you demand.

The Importance of Trend & Technical Data†

- Demonstrates consistent product quality over time
- Trend data indicating particle counts and extractable levels are available for KIMTECH PURE* G3 (non sterile) Latex and Nitrile Gloves

Example based on historical Critical Nitrile Data

AQL

Acceptable Quality Level (AQL)

- Refers to the probability of having defective gloves within a lot
- The lower the AQL number, the lower the probability of defective gloves
- KIMTECH PURE* Gloves exceed ASTM standards for freedom from pinholes and critical defects (ASTM = AQL 2.5; KIMTECH PURE* Gloves = AQL 1.5).
- A low AQL for pinholes is important – the lower the number of pinholes, the greater the level of barrier protection

Go to
www.kimtech.com/certificates
for detailed Trend & Technical Data

† Tested according to the procedure as described in IEST-RP-CC005.3: Gloves and Finger Cots used in Cleanrooms and other Controlled Environments

KIMTECH PURE[®] G3 Nitrile Gloves

(formerly SAFESKIN[®] Critical Nitrile Gloves)

Recommended for ISO Class 3 or higher cleanroom environments

Gloves

DID YOU KNOW?
One square inch of hand surface area has an average of 10,000 microorganisms.

KIMTECH PURE* and KIMBERLY-CLARK* Face Masks

Product Advantages

Comfortable protection comes in all shapes and styles

You may need to protect your people from your process – or your process from worker contamination. Whatever your cleanroom or lab application, you can count on KIMTECH PURE* Brand Masks and KIMBERLY-CLARK* TECNOL* Respirators for the quality protection you need.

Since compliance starts with comfort, our facial protection for cleanrooms, labs and sterile environments comes in a variety of protection levels, each with comfort features built in that help make our masks easy to wear all day.

For excellent particle and bacterial filtration, breathability, low lint levels, and flexible fit features, our quality masks meet regulatory standards – and your own high standards for comfort and protection.

HOW COMFORTABLE ARE YOUR MASKS?

Apertured low-linting outer layer provides protection and durability

Meltblown Polypropylene (non-sterile) or Meltblown Polyester (sterile) provide good filtration & breathability

BICOSOF® Fabric for comfort & durability

Check for Fit (Pleated style masks only)

- 1 Shiny side out
- 2 Pleats pointed down
- 3 Nose wire pinched
- 4 Head attachments secured

KIMTECH PURE* M3 Face Mask

(formerly CR CLASSIC* and CR CLASSIC* Gamma Sterile)

ISO Class 3 or higher
cleanroom environments

Available
with ties and
earloops

Low-linting
polyethylene
film outer layer

KIMTECH PURE* Wipers

Precision Performance

Innovation and precision performance for your scientific environment

From biotechnology industries to research laboratories to the electronic industries, the KIMTECH PURE* Wiper line offers a full selection of wipers for critical and controlled environment and task.

Our wipers are specifically designed for ISO Class 4 and higher cleanrooms. These wipers are ideal for the use in pharmaceutical, high-tech, biotechnology and medical device industries.

KIMTECH PURE® W4 Wipers

- 100% Polypropylene
- Recommended for ISO Class 4 or higher cleanroom environments

Double-bagged with Case Liner
