Pierce Antibodies & Abnova Antibodies

General Conditions for Sale

PRICE

The Prices set out in this Price Book are the Maximum Prices effective from 1st April, 2016 and it is open to parties to sell the products at Prices lower than the Prices set out. The Prices quoted here are Consumer Prices applicable at the time of printing and are subject to alteration without notice. Goods shall be invoiced at Prices ruling on the date of despatch.

TAXES AND DUTIES

The Prices quoted here are List Prices (not M.R.P), but are inclusive of excise duty. Central or Local Sales Tax, VAT, Octroi Charges, other duties, levies and impost are and will be charged extra unless specified otherwise as and when applicable. For exemption of Sales Tax and/or Octroi, the required declaration and/or Octroi Exemption Certificate should accompany the order. In this price book there are certain products which specify maximum retail price inclusive of all taxes.

DELIVERY

- Delivery conditions are C.I.P basis for channel partners and door delivery basis for direct customers.
- For ordered value less than ₹ 10,000 freight will be charged extra.
- While every effort will be made to adhere to delivery dates, no responsibility is and will be accepted for non-delivery or for delayed delivery.
- Items offered are subject to the goods being in stock on the date of receipt of the order.
- Road Permit wherever applicable should accompany the order, failing which the order will not be executed till such time the same is received.
- Sale of certain products is prohibited in some states. Requisite storage license and permit details should be sent along with the order for processing.

INSURANCE

- All goods are packed with utmost care and forwarded at customer's risk.
- No responsibility is taken for breakages or loss in transit. Such claims should be sent to the customer services and call within 24 hours of receipt of goods.
- Goods can be insured at the customer's request @ 2% of the invoice value.

AMENDMENTS OR CANCELLATIONS

An order once placed shall not be cancelled.

For further details or assistance, please feel free to contact us:

Ultimate

high-performance PCR plastics

Benefits

- Polycarbonate frame for warp-resistant thermal cycling
- Enhanced mechanical stability for robotic handling
- Thin-walled wells for optimal heat transfer
- Well shape optimized for maximum sample recovery
- Flat alpha-numeric lettering and raised rim well design for improved heat sealing
- Optically clear deck allows for easy visibility of wells
- Multiple frame color options, all available in both clear (for PCR) and white colored wells (for qPCR)

Thermo Scientific[®] Armadillo PCR plates combine the rigidity of a polycarbonate frame with thin-walled polypropylene wells to provide superior thermal cycling performance under all conditions without warping.

Armadillo™ plates are available in 96- and 384-well formats and multiple colors, and they can be ordered with a standard 128 barcode or custom barcoding. All formats are available with clear or white wells, with white giving superior qPCR results. The specially designed warp-resistant frame and multiple format options make Armadillo PCR plates the ultimate choice for high-throughput PCR and automated handling.

When plates maintain shape during thermal cycling there is consistent heat transfer throughout the plate and the risk of seal compromise and evaporation is greatly reduced, improving assay reproducibility. For more routine applications, we also offer non-skirted options.

1 Requires Skirted Plate ABI3100 Adapter, Cat No. AB-1069
 2 Requires Skirted Plate ABI3700 Adapter, Cat No. AB-0980
 3 Requires Semi-Skirted plate ABI3100 Adapter, Cat No. AB-1070
 4 Requires Semi-Skirted plate ABI3700 Adapter, Cat No. AB-0888
 5 Mx4000® instruments made after 2003 are also compatible with AB-1100
 6 Compatible with "Perfect Fit Frames" available from Stratagene
 7 For MegaBACE™ 1000 purchased before July 2000, use ABgene CYCLEPLATE® (AB-1243)
 8 Plates compatible with fully skirted block ONLY

Choosing a plate

Plate model recommendations are based on optimal PCR performance and ease of handling. Most recommended plates are either fully skirted or semi-skirted as these plates offer increased rigidity, which reduces plate warping during thermal cycling, facilitates multichannel pipetting, and improves overall ease of use.

Legend

- Recommended Plate
- Alternative Option

*Tip

Low profile versions minimize the air-space above the PCR reaction, further reducing evaporation effects. We recommend that you choose the low profile options where available.

Phusion and Phire Polymerase

Thermo Scientific
Phusion and Phire
DNA Polymerases

Accurate, fast and powerful Polymerases for better PCR

- Extremely accurate, fast and robust amplification
- Instant activation hot start technology
- Direct loading on gels
- dUTP tolerance and incorporation with Phusion U Polymerase

Phusion and Phire Polymerase

Upgrade to the gold standard for high-fidelity PCR

Since their introduction in 2003, Thermo Scientific™ Phusion™ High-Fidelity DNA Polymerases have established a new standard for high-fidelity PCR.(1,2)

Phusion High-Fidelity DNA Polymerase contains a DNA-binding domain fused to a *Pyrococcus*-like proofreading polymerase. Due to this unique fusion technique, Phusion DNA Polymerases generate PCR products with accuracy and speed unattainable with a single enzyme, even with difficult templates. In addition, Phusion DNA Polymerases are tolerant of various inhibitors allowing for robust amplification of PCR products with minimal optimization. For hot start PCR, Thermo Scientific™ Phusion™ Hot Start II High-Fidelity DNA Polymerase is an ideal choice allowing extreme specificity and improved robustness.

The processivity* of Phusion DNA Polymerases is approximately 10-fold greater than that of *Pfu* DNA polymerase and twice that of *Taq* DNA polymerase. This extremely high processivity results in shorter extension times, more robust amplification and the ability to amplify long templates (up to 20 kb) in a fraction of time. Phusion DNA Polymerases also produce higher yields with lower enzyme amounts than traditional proofreading polymerases.

NEW

The new Thermo Scientific™ Phusion™ Green format is a combination of Phusion DNA Polymerase and 5x Green Reaction Buffer. The buffer includes a density reagent and two tracking dyes for direct loading of PCR products on gels. The green buffer does not interfere with the performance of Phusion DNA Polymerase and is compatible with downstream applications including DNA sequencing, ligation and restriction digestion.

Features

- Accuracy – the highest fidelity thermostable polymerase (52x Taq)
- Robustness – fewer reaction failures and minimal optimization
- Speed – increased processivity allows shorter reaction times (extension 15-30 s/kb)
- High yields – increased product yields with minimal enzyme amounts (0.5-1 U/50 µL reaction)
- Specificity – unique hot start technology with zero-time reactivation reduces nonspecific amplification and primer degradation
- Direct loading of PCR product on gels – Phusion Green and Phusion Green Hot Start II DNA Polymerases have loading dyes included into reaction buffers

Applications

- High-fidelity PCR
- Fast PCR
- Hot start PCR
- Long range PCR (up to 20 kb)
- High-throughput PCR

1. D.G. Gibson *et al.*, (2008) Complete chemical synthesis, assembly, and cloning of a *Mycoplasma genitalium* genome. *Science* 319, 1215-1220.

2. D.G. Gibson *et al.*, (2010) Creation of a bacterial cell controlled by a chemically synthesized genome. *Science* 329, 52-56.

* Processivity measures the number of nucleotides the enzyme can incorporate into a growing DNA strand at one binding event during the extension step.

Amplify without purification

- PCR directly from sample tissue
- Variety of sample types: blood, plants, animal and human tissues
- Less pipetting and faster cycling
- Direct loading on gels

From plant

From animal tissue

From human specimen

From blood

Thermo Scientific MagJET
DNA and RNA Purification Kits

Get attracted to great results

- High-performance magnetic bead technology
- Wide range of samples
- Automation-compatible

Greater results with Thermo Scientific MagJET kits

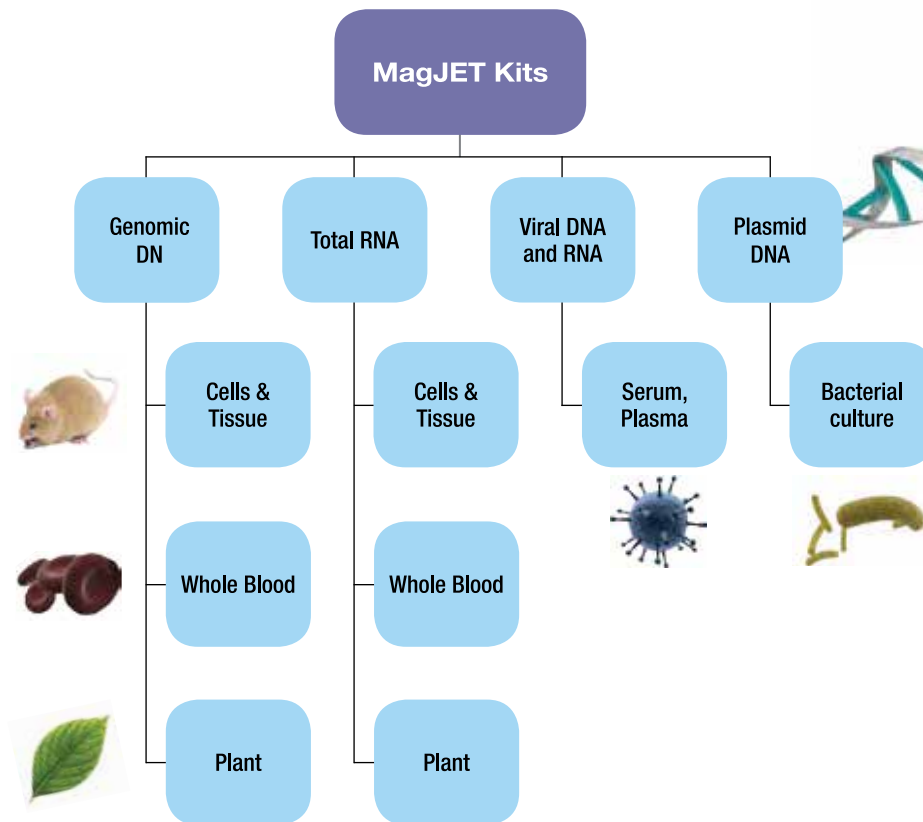

Nucleic acid isolation is a fundamental step in molecular biology applications and a prerequisite for successful experimental workflows.

Thermo Scientific™ MagJET™ nucleic acid purification kits utilize magnetic bead-based technology, allowing for highly efficient nucleic acid isolation from a variety of samples at any throughput. MagJET kits provide high-purity DNA and RNA ready to use in routine and demanding downstream applications.

Features

- Efficient - high yields of pure nucleic acids
- Versatile - compatible with a wide variety of sample types, including cells and tissues, whole blood, plants, serum, plasma, and bacterial culture
- Flexible - protocols for automated and manual workflows provided

DEOXYNUCLEOTIDES

Production Technology

Jena Bioscience is one of only a few primary manufacturers of premium quality dNTPs for PCR. Our dNTPs are synthesized by experienced personnel in Germany using enzymatic & chemical technologies followed by chromatographic cascades. While dTTP is synthesized by chemical phosphorylation of thymidine, dATP, dCTP, dGTP, and dUTP are manufactured from their corresponding Ribo-NTPs in a single step employing the highly specific enzyme Ribonucleotide Reductase (Fig. 1). Jena Bioscience's annual manufacturing capacity is multiple kilograms per year corresponding to more than 100 L of 100 mM dNTP solutions.

B = ADENINE, CYTOSINE, GUANINE, URACIL

Figure 1

The bacterial enzyme ribonucleotide reductase selectively reduces the 2'-OH-group of NTP raw materials resulting in their corresponding dNTPs. This enzymatic synthesis is performed on the kg-scale and reaches turnover of nearly 100% within a few days.

Quality

With increasing level of sophistication of PCR processes and regulatory requirements, highest dNTP quality with minimal batch-to-batch variations is simply inevitable. According to Jena Bioscience's DIN ISO 9001:2000 certified quality management system each dNTP lot is assayed by most stringent criteria regarding purity and functionality:

Purity

Purity of dNTPs is one important parameter for assessing their suitability for PCR reactions run by clinical/diagnostic laboratories or molecular biologists. Even minute amounts of impurities present in dNTP preparations may interfere with PCR, and appropriate technology for detecting and eliminating such impurities is pivotal. In principle, there are three types of impurities that need to be addressed:

I. Nucleosidic Contaminants: Include other dNTPs (e.g. deaminated/methylated dNTPs or dNTPs with a different base moiety), NTPs, and other deoxynucleoside phosphates such as dNMP, dNDP, or their tetra- and polyphosphates.

II. Inorganic Species: Include chemicals used during dNTP production/purification such as chloride, acetate, or pyrophosphate as well as contaminants potentially present in raw materials (e.g. heavy metals).

RNA / DNA PURIFICATION & CLEANUP KITS

- Excellent yields and recovery rates
- Highly pure RNA / DNA preparations for all down-stream applications
- Fast and easy preparation to save time at the bench

Our RNA / DNA preparation section covers spin column based as well as solution based genomic DNA preparation kits for isolation of **RNA and DNA from blood, bacteria, plant cells, animal tissues and yeast.** All kits are optimized for obtaining maximum yield of high quality DNA suitable for **automated sequencing, cloning, genotyping, real-time PCR, in vitro transcription and many more.**

DNA MARKERS

Log Scale DNA Ladders are well suited for standard gel electrophoresis applications. The ladders can be combined if small and large fragments need to be analyzed on the same gel.

Linear Scale DNA Ladders are designed to show virtually uniform spacing over a large fragment size range.

DNA Fragment Separation on Agarose Gels – Overview

* in TAE-buffer

DNA Fragment Size	Agarose Gel Concentration	Xylene Cyanol running at approx.*	Bromophenol Blue running at approx.*	Orange G running at approx.*
20 bp – 400 bp	3.6%	280 bp	40 bp	2 bp
50 bp – 1 kb	3.0%	500 bp	60 bp	2 bp
100 bp – 2 kb	2.4%	900 bp	100 bp	3 bp
200 bp – 4 kb	1.8%	1.8 kbp	200 bp	5 bp
500 bp – 10 kb	1.2%	4.5 kbp	500 bp	10 bp
1 kbp – 30 kb	0.6%	12 kb	1.2 kb	100 bp

Jena Bioscience DNA Ladders allow sizing and concentration estimates of DNA fragments on agarose gels generated by PCR or restriction digest. The ladders are supplied ready-to-use containing blue/orange loading dyes.

Log Scale DNA Ladders, ready-to-load						
20 bp DNA Ladder	20 – 200 bp	orange	M-212	100 ng/µl	500 µl	100 lanes
50 bp DNA Ladder	50 – 500 bp	orange	M-213	100 ng/µl	500 µl	100 lanes
100 bp DNA Ladder	100 – 1000 bp	orange / blue	M-214	100 ng/µl	500 µl	100 lanes
200 bp DNA Ladder	200 – 2000 bp	orange / blue	M-215	100 ng/µl	500 µl	100 lanes
500 bp DNA Ladder	500 – 5000 bp	blue / blue	M-216	100 ng/µl	500 µl	100 lanes
1 kb DNA Ladder	1 – 10 kb	blue / blue	M-217	100 ng/µl	500 µl	100 lanes

Linear Scale DNA Ladders, ready-to-load						
Long Range DNA Ladder	100 bp – 10 kb	orange / blue	M-205	200 ng/µl	500 µl	100 lanes
Low Range DNA Ladder	50 bp – 1 kb	orange / blue	M-202	120 ng/µl	500 µl	100 lanes
Mid Range DNA Ladder	100 bp – 3 kb	orange / blue	M-203	130 ng/µl	500 µl	100 lanes
High Range DNA Ladder	500 bp – 10 kb	blue / blue	M-204	130 ng/µl	500 µl	100 lanes

This table lists relative activities of each restriction enzyme with each buffer assuming the activity of the enzyme under optimal conditions to be 100%.

Reactions were carried out at 37°C except for those enzymes where another temperature is indicated. All reactions were carried out in the presence of BSA, 100 µg/ml, except for Fok I, where 200 µg/ml were given. Our experience indicates that it is important to use BSA in reaction mixtures in order to obtain successful digestions of DNA. The presence of BSA gives complete and reproducible cleavages for a range of DNA substrates. BSA stabilizes the enzymes when digestions are performed for more than one hour at 37°C, since many restriction endonucleases in reaction buffers without BSA can survive at this temperature for 10 – 20 minutes only or even less. Also, BSA binds metal ions, and other chemicals, which might be present in buffers or DNA preparations, thereby inactivating restriction endonucleases.

- Please keep in mind that different isoschizomers with the same specificity, supplied by different suppliers, could be of distinct origin and may vary in optimal reaction conditions or other properties. For this reason we recommend the use of original Jena Bioscience reaction buffers and assay conditions to achieve best results.

- Information on alternative reaction buffers: Fermentas GmbH (part of Thermo Fisher Scientific Inc.), www.fermentas.com and NEB Inc., www.neb.com.

- The following enzymes can exhibit "star" activity under certain conditions: BamH I, Bcl I, BseB I, BssA I, BssH II, EcoR I, EcoRV, Hind III, Hpa I, Kpn I, Nco I, Nru I, Pst I, Pvu II, Sal I, Sca I, SnaB I, Sph I, Ssp I, Xba I.

¹ Recommended amount of enzyme: One µl enzyme per µg DNA substrate

² Requires Triton X-100 for optimal activity. TX-100 is included in the supplied JBS reaction buffer.

³ BSA should be added to a final concentration of 100 µg/ml to obtain optimal activity.

⁴ BSA should be added to a final concentration of 200 µg/ml to obtain optimal activity.

[†] TX-100 should be added to the final concentration indicated on JBS datasheet to obtain optimal activity.

Restriction Enzymes Buffer Guide

Buffer 1	10 × B1	100 mM Tris-HCl (pH 7.9 at 25°C) 100 mM MgCl ₂ 10 mM Dithiothreitol 1000 µg/ml BSA
Buffer 2	10 × B2	100 mM Tris-HCl (pH 7.9 at 25°C) 100 mM MgCl ₂ 500 mM NaCl 10 mM Dithiothreitol 1000 µg/ml BSA
Buffer 3	10 × B3	500 mM Tris-HCl (pH 7.9 at 25°C) 100 mM MgCl ₂ 1000 mM NaCl 10 mM Dithiothreitol 1000 µg/ml BSA
Buffer 4	10 × B4	100 mM Tris-HCl (pH 7.9 at 25°C) 100 mM MgCl ₂ 1500 mM NaCl 10 mM Dithiothreitol 1000 µg/ml BSA
Buffer 5	10 × B5	200 mM Tris-acetate (pH 7.9 at 25°C) 100 mM Mg-acetate 500 mM K-acetate 10 mM Dithiothreitol 1000 µg/ml BSA

According to assay conditions the restriction endonucleases were divided into five groups. Each group is more active in one of the five following buffers.

- Some restriction endonucleases require Triton-X (TX-100). This means that 100% of the activity is obtained using this additive. Several enzymes – *BamH I*, *Bgl I*, *BseA I*, *BsiS I*, *BssA I*, *BstE II*, *CspA I*, *Dpn I*, *EcoR I*, *Fok I*, *Hinc II*, *Kpn I*, *Mbo I*, *Mme I*, *Nar I*, *Not I*, *Nru I*, *Pst I*, *Sca I*, *SnaB I* and *Taq I* – require unique buffers for optimal reaction conditions. The composition of each unique buffer is presented in specific restriction endonuclease description and as well in the Data Sheet provided with each Enzyme.
- 10x reaction buffers should be thawed completely and mixed thoroughly before using.

Our Fisher BioReagents line of electrophoresis buffers is available in various package configurations to suit all budgets. Choose from the most economical powder components, through concentrated stock solutions, to ready-to-use concentrations in specially designed containers featuring faucets for easy dispensing.

Two buffers commonly used for DNA agarose electrophoresis are Tris-acetate with EDTA (TAE; 40mM Tris-acetate, 1mM EDTA) and Tris-borate with EDTA (TBE, 89mM Tris-borate, 2mM EDTA). Because the pH of these buffers is neutral, the phosphate backbone of DNA has a net negative charge and migrates toward the anode. TAE and TBE have different properties which makes one more suitable than the other for a specific purpose.

MOPS is a commonly used buffer system for RNA electrophoresis using formaldehyde or formamide denatured RNA. It is important to use RNase-free chemicals, water, and containers when preparing the buffer solution. The typical formulation of a 10X MOPS running buffer is 0.4M MOPS (pH 7.0), 0.1M sodium acetate, and 0.01M EDTA.

The denaturing system chosen depends on the purpose of the RNA experiment and the size of the RNA fragment being separated. Formaldehyde denaturation is suitable if RNA samples are to be recovered. Formamide denaturation is suitable if the RNA needs to retain its biological activity.

Buffer	Suggested Uses	Properties
TAE	DNA recovery. Electrophoresis of large DNA (>12 kb).	Low buffering capacity. Recirculation may be necessary for extended run times (>6 hr).
TBE	Electrophoresis of small DNA (< 1kb). Increased resolution of small DNA (< 1kb).	Decreased DNA mobility. High buffering capacity – no recirculation required for extended run times.
MoPs	Electrophoresis of formaldehyde denatured RNA.	Buffer is low in ionic strength. Recirculation of buffer may be necessary.

Fisher BioReagents

APPLICATION

SurePrep RNA/ DNA/ Protein Purification Kits rapidly isolate and purify total RNA, genomic DNA and total proteins sequentially from a single sample. Samples may consist of cultured animal cells, tissue samples, blood, bacteria, yeast, fungi or plants. These kits are useful for isolating macromolecules from difficult-to-obtain or small samples such as biopsy materials because the SurePrep process eliminates the need to fractionate the sample. SurePrep kits are well suited for academic and medical research.

KEY FEATURES AND BENEFITS

- Fast and easy processing using efficient spin-column procedure
- Total RNA, genomic DNA and proteins are all column-purified using the same column
- Sequential isolation of nucleic acids and proteins from a single lysate; no need to split the lysate
- Isolate high-quality RNA in all sizes, including large mRNA and rRNA to Micro RNA (miRNA)
- Analysis is more reliable since RNA, DNA and proteins are derived from the same sample
- Isolate high-quality genomic DNA with a molecular weight ≥ 30 kb
- High yields of isolated proteins
- No phenol or chloroform extractions

DOWNSTREAM APPLICATIONS

RNA

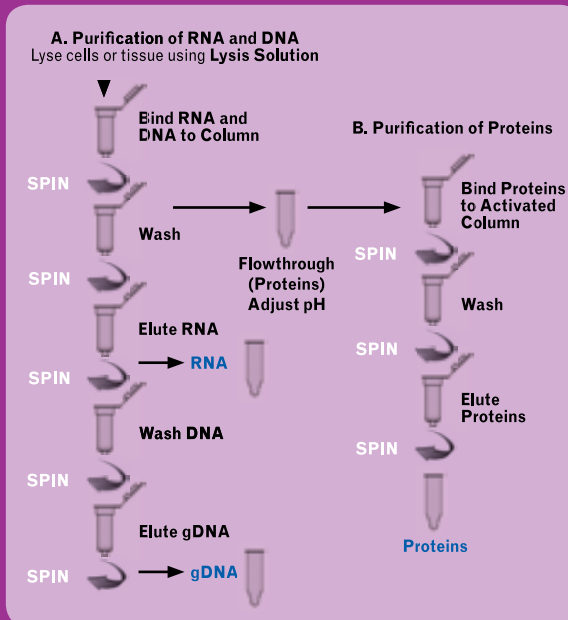

- qRT-PCR
- Northern blotting
- RNase protection
- Primer extension
- Expression array analysis

GENOMIC DNA

- PCR
- Sequencing
- Southern blotting
- SNP analysis

GENOMIC DNA

- SDS-PAGE analysis
- Western blots
- Mass Spectrometry

SurePrep RNA/DNA/PROTEIN PURIFICATIONS - SPECIFICATIONS

KEY SPECIFICATION:

Column Binding Capacity	50µg for RNA 20µg for DNA 200µg for protein
Maximum Column Loading Volume	600µL
Size of RNA Purified	All sizes, including small RNA (<200 nt)
Size of DNA Purified	≥ 30 kb
Maximum Amount of Starting Material	
Animal Cells	3×10^6 cells
Animal tissues	25mg
Blood	100µL
Bacteria	1×10^9 cells
Yeast	1×10^8 cells
Fungi	50mg
Plant Tissues	50mg
Time to complete purification process	30 minutes for 10 purifications
Average Yields from RNA Purification	
HeLa Cells (1×10^6 cells)	15µg RNA
HeLa Cells (1×10^6 cells)	8µg DNA
HeLa Cells (1×10^6 cells)	150µg protein

KIT COMPONENTS:

Lysis Solution, 40mL; RNA wash Solution, 20ml; RNA Elution Solution, 6mL; gDNA Wash Solution, 15mL; gDNA Elution Buffer, 15mL; Protein Column Regeneration Buffer, 30mL; Protein Column Activation And Wash Buffer, 60mL; Protein pH Binding Buffer, 4mL; Protein Elution Buffer, 8mL; Protein Neutralizer, 2mL; Protein Loading Dye, 2mL; Spin Columns, 50; Collection tubes, 200; Products Insert

RECOMMENDED STORAGE:

The Protein Loading Dye should be stored at -20°C upon arrival. All other solutions should be kept tightly sealed and stored at room temperature.

FISHERBRAND

ThermoFisher
SCIENTIFIC

Fisherbrand Easy Reader Tubes

With conical bottoms. Easy Reader Tubes feature black printed graduations evenly spaced to enhance readability, without sacrificing precision. A large white marking area makes it easy to label samples. 15 and 50 mL tube sizes are available in several configurations to suit virtually any application. Choose from clear polypropylene tubes, which withstand forces to 6000 x g. All sizes and types are available with a blue plug-seal closure that has a double-start thread design for a tight, secure seal. Most styles and sizes are also available with standard flat-top caps. Tubes are sterilized by gamma radiation. Tubes come packaged in equals and sleeves for easy handling. 15mL PET and 50 mL polypropylene also come in bulk packs (resealable plastic bags).

Fisherbrand 50mL and 15mL Easy Reader Centrifuge Tubes

With easy-to-read black graduations and a large white marking area

Durable, chemical-resistant, clear polypropylene

- Graduations are marked in 5mL increments from 5 to 50mL
- Sterile
- Conical bottom and flat or plug seal cap
- Packed in foam racks or sleeves
- Case of 500d

15 mL Tubes

Graduated in 0.5 mL increments from 2 to 14.5 mL.

Size: 17 mm (O.D.) x 119 mm (L)

Fisher Scientific Cat. No.	Max RCF (x g)	Type	Closure	Inner Pack	Case Qty	Price in ₹
Polypropylene						
055395	6000	Sterile	Plug Seal	50/rack	500	POR*
0553912	6000	Sterile	Flat Top	50/rack	500	POR*

50 mL Tubes

Graduated in 5 mL increments from 5 to 50 mL.

Size: 28 mm (O.D.) x 115 mm (L)

Fisher Scientific Cat. No.	Max RCF (x g)	Type	Closure	Inner Pack	Case Qty	Price in ₹
Polypropylene						
055397	6000	Sterile	Plug Seal	25/sleeve	500	POR*
0553913	6000	Sterile	Flat Top	25/sleeve	500	POR*

Fisherbrand 50 mL Higher-Speed Easy Reader Tubes

With conical bottoms. High-Speed Easy Reader Tubes are made of durable, chemical-resistant, clear polypropylene. Withstand forces to 9400 x g. Black printed graduations are marked in 5 mL increments from 5 to 50 mL; a large white marking area makes labeling samples easy. Choose from blue plug-seal or flat-top caps. Both styles offer secure, leak-resistant seals. Plug-seal closure features double-start thread design for an exceptionally tight seal. Flat-top caps offer faster handling and allow you to label the top of the tube. Tubes are sterilized by gamma radiation. Available packaged in foam racks or in bulk packs (resealable plastic sleeves).

Fisher Scientific Cat. No.	Max RCF (x g)	Type	Closure	Inner Pack	Case Qty	Price in ₹
0644321	9400	Sterile	Plug Seal	25/sleeve	500	POR*

Sterile, nonwetable pipets are certified nonpyrogenic with an endotoxin level less than 0.5 EU/mL following USP XXII Bacterial Endotoxins Test (85). All pipets are calibrated “To Deliver/Blow Out” with a tolerance of $\pm 2\%$ at full volume and have a plugged mouthpiece. Each pipet lot is tested for sterility, accuracy and endotoxin level.

Serological Pipets with Magnifier Stripe

These pipets are suitable for tissue culture work. Black magnifier stripe runs lengthwise along pipet making meniscus obvious at arm’s length—reducing read errors. Pipets have improved optical clarity—high-contrast black markings make volumes easier to read. 5, 10, 25, and 50 mL pipets have ascending and descending graduations. Improved tip design on 25 and 50 mL pipets increases the effect of surface tension to minimize dripping. Individually wrapped pipets are ideal for small-volume use requiring sterility and are available in either

a clear, durable all-plastic wrap, or a color-coded paper/plastic wrap. Multipack for larger-volume use permits easy access to several pipets at a time without contaminating unused pipets. Color coding on each pipet and on inner bags for multipack pipets makes it easy to spot the size you need. Inner bags and outer boxes are recyclable.

Paper/plastic, Individually Wrapped

Fisher Scientific Cat. No.	Cap. (mL)	Subdiv. (mL)	Color Code	Inner Qty	Case Qty	Price in ₹
1367811B	1	1/100	Yellow	50	1000	POR*
1367811C	2	1/100	Green	50	500	POR*
1367811D	5	1/10	Blue	50	200	POR*
1367811E	10	1/10	Orange	50	200	POR*
1367811	25	2/10	Red	25	200	POR*
1367811F	50	5/10	Purple	25	100	POR*

Larger Bolder Graduations

Fisherbrand pipets feature larger, bolder graduations for easier volume reading and a vertical color-coded magnifying stripe for fast size identification. Bidirectional ascending and descending graduations simplify fluid measuring and dispensing. They are available in 1, 2, 5, 10, 25, 50, and 100 mL sizes.

The Anti-drip Tip

The anti-drip tip on 25, 50, and 100 mL pipets reduces accidental drippage and ensures dispensing accuracy.

Three Packaging Options

New anti-static all-plastic wrap

Features easy opening for aseptic removal and eliminates static cling when wearing latex gloves. You can see the pipet through the clear plastic wrap for instant size identification. Plus, space saving packaging reduces storage requirements, waste, and one material makes it easy to recycle.

Paper/plastic wrap

Allows easy opening by either pop-through or peel-apart techniques. Ideal for sterile tissue culture applications. The paper wrap is color coded for easy product identification.

Bulk pack

Ideal for high volume liquid handling applications and are packaged sterile in a resealable polyethylene bag.

Protein Biology Workflow

Special Techniques

- Ab Production
- Protein Assays
- Protein Modification
- Protein-Protein Interactions
- Protein-Nucleic Acid Interactions

One power station + two cassettes = powerful possibilities.

Affinity Purification Supports

Affinity purification involves the separation of molecules in solution (mobile phase) based on differences in binding interaction with a ligand that is immobilized to a stationary material (solid phase). The solid phase in affinity purification is a support or matrix material that a biospecific ligand may be covalently attached. Typically, the material to be used as an affinity matrix is insoluble in the system in which the target molecule is found. Usually, but not always, the insoluble matrix is a solid. Hundreds of substances have been described and employed as affinity matrices.

Useful affinity supports are those with a high surface area to volume ratio, chemical groups that are easily modified for covalent attachment of ligands, minimal nonspecific binding properties, good flow characteristics, and mechanical and chemical stability. When choosing an affinity support or matrix for any separation, the most important question to answer is whether a reliable commercial source exists for the desired matrix material in the quantities required. Fortunately, we offer a wide range of practical and efficient matrices in volumes ranging from 1mL to much larger bulk quantities.

Porous Beaded Resins

Porous beaded supports generally provide the most useful properties for affinity purification of proteins. We offer affinity purification products in two main porous gel support formats: crosslinked beaded agarose and Thermo Scientific UltraLink Biosupport. The various features of these two supports are listed in the accompanying table. Agarose is good for routine applications but crushes easily, making it suitable for gravity-flow column or smallscale batch procedures using low-speed centrifugation. UltraLink Biosupport is incompressible and can be used in high-pressure applications with a peristaltic pump or other liquid chromatography system. In addition, UltraLink® Supports display extremely low nonspecific binding characteristics because they are polyacrylamide-based. Both supports perform well in typical gravity-flow and spin column purification and immunoprecipitation procedures.

Magnetic Particles

When a matrix is required for affinity purification of cells within a population, we recommend Thermo Scientific MagnaBind Beads. Magnetic affinity separation is a convenient method for isolating antibodies, antigens, lectins, enzymes, nucleic acids and cells while retaining biological activity. Samples containing the molecule of interest are incubated with beads that are derivatized with an antibody or other binding partner. A rare earth magnet is used to pull the MagnaBind™ Beads out of solution and onto a surface. The buffer can be carefully removed, containing any non-bound molecules or cells.

MagnaBind Beads consist of a silanized surface over an iron oxide core (see Table 2). The silanized surface has been derivatized to contain active groups, such as carboxylic acids or primary amines, or specific affinity molecules such as streptavidin; Protein A; Protein G; or goat anti-mouse, anti-rabbit or anti-rat IgG. Due to the nature of the MagnaBind Beads, strong elution conditions are not recommended with these products. See page 80 for a complete listing of MagnaBind Supports.

Protein Purification

Spin Cups and Columns

Thermo Scientific Pierce Spin Columns are convenient tools for manipulating small volumes of affinity supports (5–500 μ L) for protein purification. Add the affinity resin and sample to one of the columns, use a microcentrifuge to efficiently wash away contaminants and elute your purified sample without losing any resin in the process. Spin columns allow you to affinity-purify more protein in less time!

Highlights:

- Efficient washing of samples means fewer washes are needed to remove contaminating proteins
- Efficient elution of samples means more antigen and co-precipitated proteins are recovered
- No resin loss means more consistent IP and co-IP results
- No need to decant supernatant from IP or co-IP pellet
- Spin protocols drastically reduce the time required for IPs and co-IPs
- Low protein-binding polypropylene column construction minimizes nonspecific binding

Spin Cups – Paper Filter

Paper filter with collection tubes.

Highlights:

- Paper filters are resistant to clogging from cellular debris
- Column Volume: 600 μ L
- Resin Volume: 20–300 μ L
- Filter Type: Paper, ~10 μ m pore size
- Cap Type: Collection tube cap fits onto inserted spin cup

Spin Cups – Cellulose Acetate Filter

Cellulose acetate filter with collection tubes.

Highlights:

- Used in our IP and Co-IP Kits
- Column Volume: 800 μ L
- Resin Volume: 20–400 μ L
- Filter Type: Cellulose acetate, 0.45 μ m pore size
- Cap Type: Collection tube cap fits onto inserted spin cup

Spin Columns – Screw Cap

Screw cap with Luer-Lok® Adaptors.

Highlights:

- Luer-Lok Adaptors allow these columns to be used for syringe-based purifications
- Column Volume: 900 μ L
- Resin Volume: 20–400 μ L
- Filter Type: Polyethylene, ~10 μ m pore size
- Small & large frit options for different sample sizes
- Cap Type: O-ring screw top caps; press-in bottom plugs

Spin Columns – Snap Cap

Snap cap with collection tubes.

Highlights:

- Used in the Cell Surface Protein Isolation and Glycoprotein Isolation Kits
- Column Volume: 1,000 μ L
- Resin Volume: 20–500 μ L
- Filter Type: Polyethylene, ~30 μ m pore size
- Cap Type: Snap cap on column (no cap on collection tube); press-on bottom caps

Micro-Spin Columns

Highlights:

- Column Volume: 400 μ L
- Resin Volume: 5–100 μ L
- Filter Type: Polyethylene, ~30 μ m pore size
- Cap Type: O-ring screw top caps; press-on bottom caps

Dialysis Products Optimized for Sample Volume and Throughput

Thermo Scientific Dialysis Products have evolved over the last decade to meet a variety of customer needs. Our broad portfolio of highperformance tools for dialysis, buffer exchange and sample clean up provides easy handling, enhanced sample protection and exceptional recovery for small to larger volumes. Available in a variety of formats, it's easy to find the best dialysis product for your application.

Table 1. Thermo Scientific Zeba Desalting Products selection guide by format and recommended sample volume.

Format								
Resin Bed	75µL	0.5mL	2mL	5mL	10mL	550µL	1mL	5mL
Sample Volume (7K MWCO)	2-12µL	30-130µL	200-700µL	500-2000µL	700-4000µL	20-100µL	50-250µL	100-1500µL
Sample Volume (40K MWCO)	5-14µL	70-200µL	200-900µL	300-2000µL	1000-4000µL	20-100µL		

Table 2. Thermo Scientific Zeba Resin selection guide by protein recovery and small molecule removal.

Size	7K		40K	
	Recovery	Removal	Recovery	Removal
Peptide/Protein < 7kDa	NR		NR	
Protein 7-13kDa	++		+	
Protein 14-20kDa	+++		++	
Protein 20-150kDa	+++		+++	
Molecule < 500Da		+++		+++
Molecule 600-1200Da		++		+++
Molecule 1200-1500Da		+		++
Molecule > 1500-2000Da		NR		+

NR = Not Recommended + = Good ++ = Better +++ = Recommended

DyLight Dye glowing advantages

Bright new alternatives to other fluorescent dyes

Thermo Scientific DyLight Amine-Reactive and Sulfhydryl-Reactive Fluorescent Dyes

DyLight® Dyes have absorption spectra ranging from 353nm to 770nm (Table 1) and match the principal output wavelengths of common fluorescence instrumentation. The DyLight Dyes exhibit higher fluorescence intensity and photostability than Alexa Fluor®, CyDye® and LI-COR® Dyes in many applications and remain highly fluorescent over a broad pH range (pH 4-9). Additionally, the water solubility of the DyLight Dyes allows a high dye-to-protein ratio without precipitation during conjugation.

Figure 1. Thermo Scientific DyLight 488 and DyLight 633 Dyes exhibit outstanding fluorescence in structured illumination. The uniform fluorescence intensity throughout the images demonstrates the outstanding brightness and photostability of DyLight 488 and 633 Dyes. Red: Alpha-tubulin detected in HeLa cells with anti-tubulin monoclonal antibody and DyLight 633 Dye-conjugated secondary antibody (highly cross-adsorbed). Green: Histone H4 detected with anti-histone monoclonal antibody and DyLight 488 Dye-conjugated secondary antibody (highly cross-adsorbed). Blue: Nucleus counter-stained with fluorescent mounting media containing DAPI. Images were acquired with the Axio Imager™ Z1 and ApoTome™ Slider (Zeiss MicroImaging, Inc). The ApoTome Module provides confocal-like resolution allowing optical sectioning without using a pinhole (e.g., confocal). No image enhancement was performed.

Table 1. Spectral properties of Thermo Scientific DyLight Fluorescent Dyes.

Emission	DyLight Dye	Ex/Em*	ε†	Spectrally Similar Dyes
Blue	350	353/432	15,000	AMCA, Alexa Fluor 350 Dye
Blue	405	400/420	30,000	Alexa Fluor 405 and Cascade Blue® Dyes
Green	488	493/518	70,000	Alexa Fluor 488, fluorescein and FITC Dyes
Yellow	550	556/576	80,000	Alexa Fluor 546, Alexa Fluor 555, Cy®3 and TRITC Dyes
Red	594	593/618	80,000	Alexa Fluor 594 and Texas Red® Dyes
Red	633	638/658	170,000	Alexa Fluor 633 Dye
Red	650	652/677	250,000	Alexa Fluor 647 and Cy5 Dyes
Near-IR	680	692/712	140,000	Alexa Fluor 680 and Cy5.5 Dyes
Near-IR	755	754/776	220,000	Alexa Fluor 750 and Cy7 Dyes
Near-IR	800	777/790	270,000	IRDye® 800 Dye

*Excitation and emission maxima in nanometers (± 4nm)

† Molar extinction coefficient (M⁻¹ cm⁻¹)

fluorescent labelling

Excellent photostability make these dyes the clear alternative

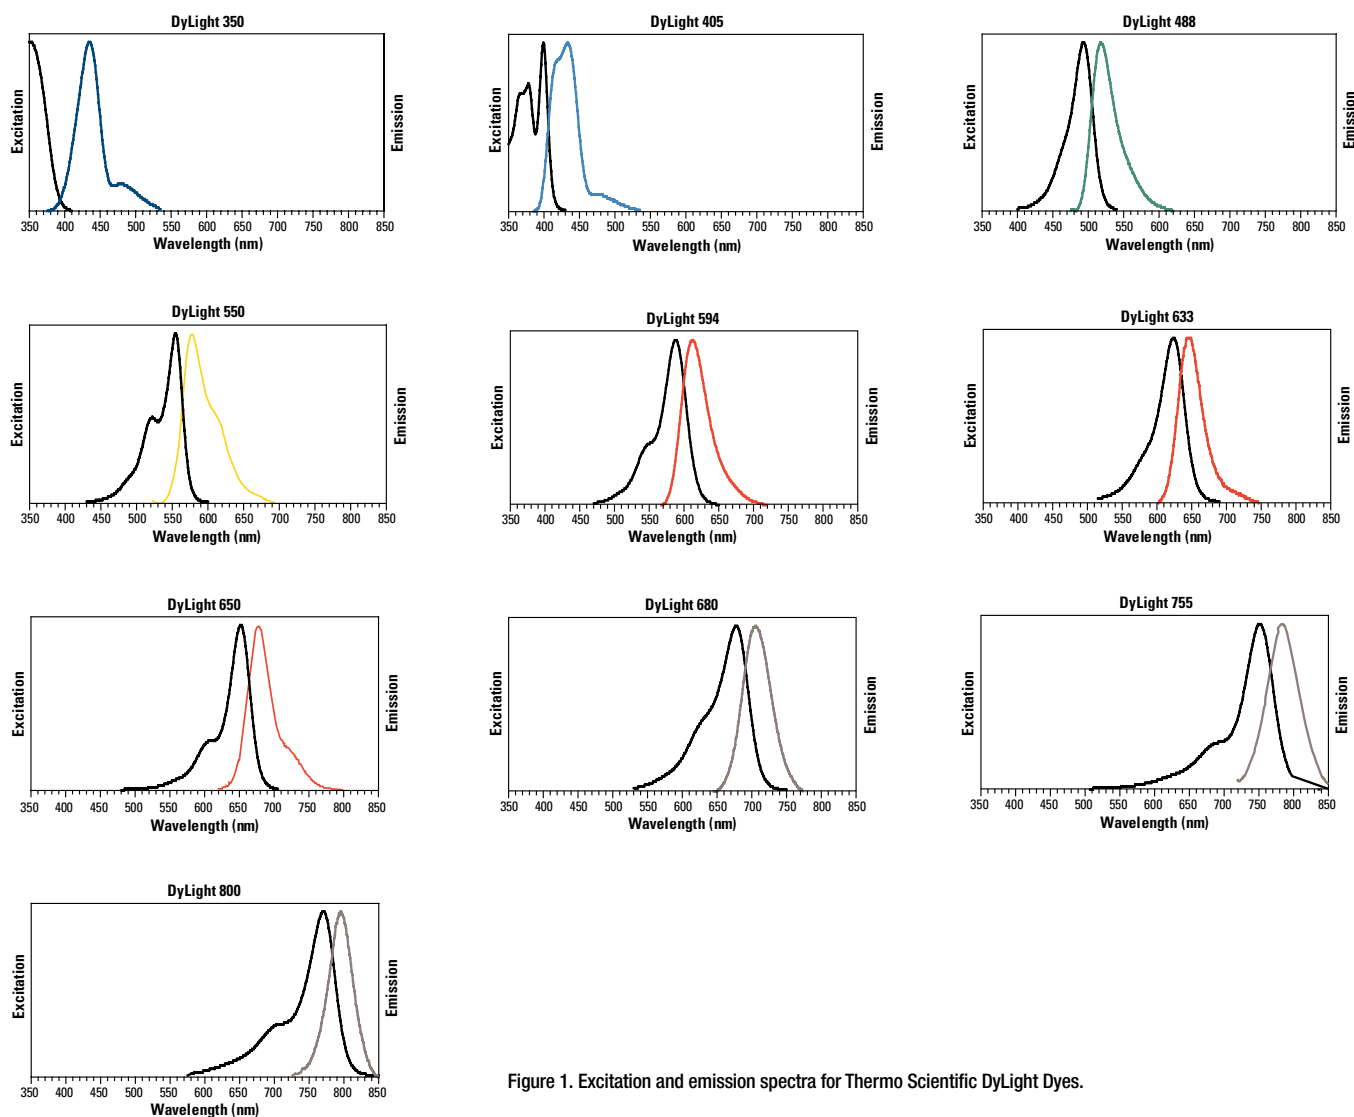

Thermo Scientific DyLight Amine-Reactive and Sulfhydryl-Reactive Dyes

Highlights:

- Available in both amine- and sulfhydryl-reactive chemistries for fast and efficient labeling of IgG or other proteins
- High water solubility
- Excellent photostability
- Compatible with common fluorescence instrumentation

Applications:

- Fluorescence microscopy
- Western blot detection
- Protein arrays
- Flow cytometry
- ELISA
- FRET-based technology
- And many more

Brightest glow, smallest luciferase for HTS reporter gene assays

Thermo Scientific TurboLuc Luciferase One-Step Glow Assay Kit

The Thermo Scientific™ TurboLuc™ One-Step Glow Assay Kit provides a highly sensitive luciferase-based assay to measure promoter activity, study upstream cellular pathway activity, or determine the effect of activators or inhibitors in mammalian cell culture. Thermo Scientific™ TurboLuc™ 16 (Tluc16) Luciferase and the Thermo Scientific™ TurboLuc™ One-Step Glow Assay Reagents form a convenient, one-step homogeneous protocol that supports use in automated formats, including luminometers without injectors as well as high-throughput screening (HTS) applications.

Highlights:

- **HTS-compatible** – add-mix-read format (one-step format) makes our reagents automation-friendly
- **Sensitive** – bright TurboLuc Luciferase allows detection of luciferase activity from a single copy of reporter gene per cell
- **Stable** – signal half-life is equivalent to NanoLuc Luciferase from Promega
- **Simple** – does not require a luminometer with injectors
- **Flexible** – expression vectors available with or without dual destabilization technology (DD) and minimal promoter (minP) sequence

Luciferase Assay

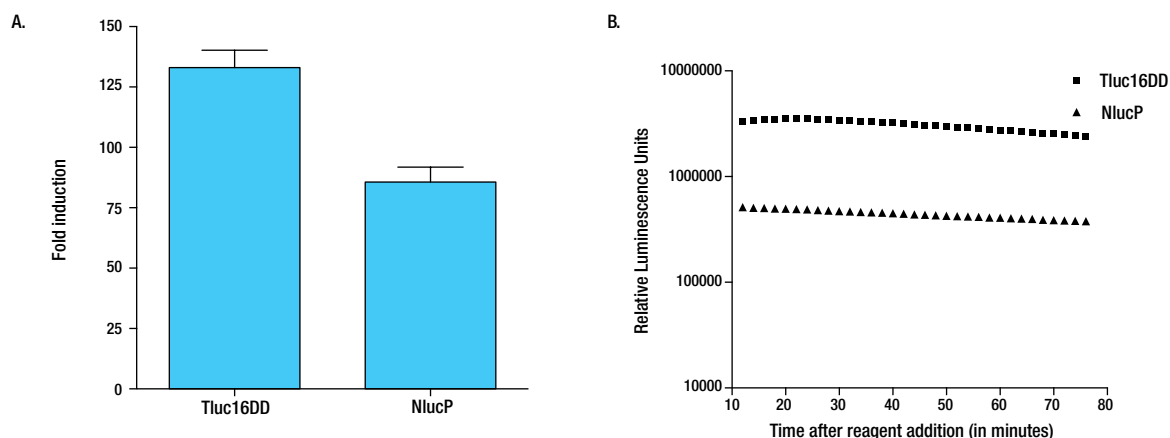

Figure 3. Comparison of response and glow kinetics (signal stability) between Tluc16 and Nanoluc reporter systems. HEK 293 cells transfected with plasmid DNA containing either dual destabilized TurboLuc Luciferase (pCRE-TlucDD) or destabilized Nanoluc (CRE-NlucP) as reporter under the control of Cyclic AMP-response elements were plated into 96-well plate at a density of 20K cells/well. The cells were treated with either 10mM forskolin to induce expression of luciferase or vehicle as control for 3hrs and processed for luciferase activity using the TurboLuc Luciferase One-Step Glow Assay Kit for Tluc16 luciferase or Nano-Glo™ Luciferase Assay for NlucP luciferase, respectively. **Panel A:** Comparison of response between Tluc16 and Nanoluc reporter systems. Results are displayed as fold induction of TurboLuc Luciferase (Tuc16DD) or Nanoluc Luciferase (NlucP) relative to the untreated condition (no forskolin) for each reporter. **Panel B:** Comparison of signal stability obtained from Tluc16 and Nanoluc reporter systems.

The luminescence signal emitted by these luciferases was recorded over a period of 1hr.

Optimizing Your Results Across Every Stage of Cell Culture

Cell culture research is becoming more challenging everyday, making the requirement for superior product quality and performance across each stage of cell culture more critical than ever.

Thermo Fisher Scientific offers a complete portfolio of cell culture products and solutions that lead the industry worldwide in quality, choice and innovation – so researchers can advance their work with complete confidence.

Thermo Scientific Nunclon Sphera
Flasks, Dishes and Plates

**making your
most valuable work
your best work**

Advancing your cell culture research

Optimizing spheroid formation

The Thermo Scientific™ Nunclon™ Sphera culture surface allows cells to grow in suspension with virtually no cell attachment. The new surface supports many different cell types and their ability to generate spheroids; studies show that over time the spheroids grow in volume, indicating that the new surface enables consistent, repeatable cell growth.

ENHANCING SPHEROID CULTURES ACROSS MANY CELL TYPES

EXPANDING SIZE OF SPHEROIDS WITH DIFFERENT SEEDING DENSITY

Growing 3D cancer cultures

The Nunclon Sphera surface minimizes variability and supports the consistent formation of cancer spheroids that simulate the 3D structures of tumor growth, providing a better model system for studying tumor cell progression and efficacy of anticancer agents *in vitro*.

OUTPERFORMING NON-TREATED PETRI DISH FOR CANCER SPHEROID CULTURE

GENERATING FAVORABLE NUMBER OF CANCER SPHEROIDS

Our cell culture inserts and carrier plates meet ANSI standards and are equipped with alphanumeric well identification; all items are USP Class VI, sterile and include lids.

Carrier Plates for Cell Culture Inserts

Nunc Carrier Plates are designed for versatility in your research. The system for manipulating multiple inserts can be used for individual compartment cultures or cultures with shared media. Use with up to 12 or 24 inserts at a time.

Carrier plates come in two formats that correspond with our 12- and 24-well Nunclon Delta treated dishes.

Uniquely engineered carrier plate features a support structure that enables variable height. Simply rotate the insert to engage one of the three height-adjusting tabs into the carrier plate supports.

Polycarbonate membrane available in three pore sizes for enhanced flexibility in your research. Perfect for 3-D imaging; translucent membrane becomes transparent when wet. See back cover for specifications.

Distance between membrane and well

Low position	0.9 mm
Medium position	3.3 mm
High position	6.3 mm

Optimizing your research

Thermo Fisher Scientific offers a wide range of cell culture inserts –featuring our Nunclon™ Delta surface treatment of the membrane –as well as uniquely adjustable, flexible carrier plates.

Polycarbonate Cell Culture Inserts

Nunc™ Polycarbonate Cell Culture Inserts in Nunclon Delta treated multi-dishes are easy to use for cultivation of most cell types, without matrix coating, and optimized for 3-D cell imaging.

An assortment of dish and insert sizes, along with multiple insert membrane pore sizes, support a wide range of applications.

Cell culture inserts

tested to ensure optimal cell growth.

Application Examples

Transport Studies

Molecules including hormones and growth factors
Drug transport across epithelial (Caco-2) and endothelial barriers
Drug transport across brain microvascular endothelial cells

Pore size, μm - 0.4 or 3.0

Co-cultivation studies

Cell-cell interaction
Cell-matrix interaction
Cell-substrate interaction

Pore size, μm - 0.4 or 3.0

Tissue engineering

Angiogenesis
Dermal/epidermal and epithelial tissue models

Pore size, μm - 0.4 or 3.0

Chemotaxis studies

Migration of cells including eosinophils and macrophages

Pore size, μm - 3.0 or 8.0

Invasion studies

Tumor invasion and metastasis models
Invasion inhibitors
Extra cellular matrix effects

Pore size, μm - 3.0 or 8.0

Thermo Scientific Nalgene InVitro Biotainers ideal for safe **storage** and **transport**

Nalgene™ InVitro™ Biotainer™ bottles and carboys are designed specifically for the storage and transportation of active pharmaceutical ingredients. Extensive regulatory documentation assures that the products meet your demanding biotechnology requirements and reduces the time and cost to implement them in your process.

- No risk of valuable contents loss with the leakproof assurance
- Puncture and impact resistant bottles and carboys secure your highly valuable contents
- Supported by extensive validation documentation to reduce time and cost at implementation
- Customized fluid transfer option available to fit your specific process application
- Industry leading custom analytical lab services and on-site support
- Easy-to-read graduation, lot number and expiration date for convenient, no-mistake traceability

Materials

- Non-cytotoxic
- Non-pyrogenic
- FDA compliant (21CFR)
- FDA Registered DMF #'s
- Materials are tested to meet

Materials are tested to meet

- FDA Modified ISO 10993
- USP Class VI
- EP Modified Abnormal Toxicity Test
- *In Vitro* Cytotoxicity
- USP <661>

Additional Literature

- InVitro Biotainer Technical Bulletin
- InVitro Biotainer Validation Binders*

* Validation binders are available to customers as support documentation during your product validation process. This confidential information can be requested at: rocrgsupport@thermofisher.com. Following your request submission, a Confidentiality Agreement will be forwarded to you for completion.

9 reasons to use Nalgene products

- 1 | Rugged and durable: leakproof guarantee
- 2 | Shatterproof
- 3 | High purity resins
- 4 | Economical and ecological
- 5 | Unmatched selection of plastics and sizes
- 6 | Available technical support
- 7 | Scalable from lab to production
- 8 | Meets regulatory standards
- 9 | Nalgene Quality ISO 13485:2003

more confidence, less risk

Compact, single-use systems for every application

Our multi-layer Nunc™ Cell Factory™ systems are designed to meet the needs of a variety of biological and commercial applications. With a certified Sterility Assurance Level of 10^{-6} achieved following AAMI/ISO 11137-2-2006 guidelines and Nunclon™ Delta surface treatment you can be assured of consistent performance from layer to layer and lot to lot.

Our cell culture certification includes verification of monolayer formation and cloning efficiency using three cell lines and one primary cell.

Three system configurations are available — offering solutions from research to commercial GMP-scale applications:

1 Cell Factory - Original

The original Nunc Cell Factory system features two standard ports – providing a closed system that is ideal for production of cellular therapeutics and industrial-scale vaccine manufacturing.

2 EasyFill™ Cell Factory

Highly versatile and easy to use, the EasyFill Cell Factory system offers a sterile, single-use solution designed to optimize valuable incubator space and reduce repetitious manual handling. Suitable for both research and commercial-scale production.

3 Cell Factory with Active Gassing

This patented design promotes a uniform culturing environment from layer to layer through the equal distribution of gasses. It is ideal for large-scale manufacturing of cellular therapeutics, stem cells and difficult-to-grow cell lines.

- Bioproduction Solutions
- Peristaltic Pumps

Thermo Scientific Nunc TufRol PS Roller Bottles

Easier and faster upscaling

Minimize validation of cell culture scale-up processes from plates to flasks to roller bottles by choosing a family of products that utilize polystyrene materials

Nunc TufRol™ PS Roller Bottles are available with a smooth surface with an industry standard growth area of 850cm² or a pleated surface of 1450 cm². Easy on/off standard or vented caps are available.

We worked hard to make it easy

Working with valuable cell cultures, you need to rely on critical consumables that will not distract you from the matter at hand. That is why we have worked hard to make our roller bottles as easy to use as possible.

- **Ergonomic design** Unique indentatin in the bottom of TufRol EZ Roller Bottles facilitates both manual and automated handling
- **Pleated surgace** increases growth area by over 40% without taking up additional space. The unique vertical pleats make emptying easier and with less product retention
- **Easy on/off caps** are engineered to prevent misthreading while providing a secure seal

TufRol EZ Roller Bottles can be held from the bottom when pouring; a comfortable and convenient grip for many production technicians

cell growth is nothing
without control

Your cell cultures are valuable, often irreplaceable.
Surround them with an environment you can trust.

Thermo Scientific HyClone SFM4MegaVir is a protein-free medium containing no animal derived components to support culture of adherent cell lines.

This regulatory - friendly medium is developed through Metabolic Pathway Design™ to increase process yields in the manufacture of viral vaccines in a variety of cell lines including Vero, COS-7, MDCK and MDBK

- Suitable for direct adaptation
- Component traceability
- manufactured according to cGMP guidelines

Last line of defense.

- 0.1 micron filters guard against mycoplasma contamination.
- 0.2 micron filters remove all bacteria.
- 0.45 and 0.8 micron filters for particle removal and fluid clarification.
- 90 mm diameter filters provide large surface area for serum and other hard-to-filter solutions.
- Nalgene Certified. We guarantee it!

Easy to use shape.

- Ergonomic design.
- 1½ turn screw cap, tapered sides and “grips” make the filter units and storage bottles easy to handle.
- Wide base improves stability on the bench top.

Filtration

Unbeatable membranes.

No matter what aqueous fluid you're filtering, we have the right membrane for you:

- PES (polyethersulfone)
- SFCA (surfactant-free cellulose acetate)
- CN (cellulose nitrate)
- NYLON

Critical interface.

Multi-column design delivers uniformity and consistency. The Rapid-Flow membrane support system, when coupled with any of our membrane options, offers fast flow rates and higher throughput.

Surface for passive binding

Covalent coupling surfaces

Affinity Capture Surfaces

The right surface for your assay.

In this section, you will find valuable information about products relating to passive binding surfaces for biomacromolecules, covalent coupling surfaces for smaller biomolecules, and affinity capture surface for affinitytagged biomolecules. Immunoassay techniques are extremely sensitive and contain detection limits in the range of 10 fmol. In order to obtain accurate and reproducible results, it is essential that you choose the appropriate surface with optimized conditions.

By choosing a Thermo Scientific plate, you benefit from more than 30 years of industry-leading experience in immunoassay plate technology, and a broad range of surfaces and formats to optimize your assay.

Diagnostic Bottles

Small-volume bottles for all of your diagnostic packaging requirements

Our extensive line of diagnostic bottles allows you to select just the right size, shape, and style for your packaging application. Biologically tested and validated, you can be confident that your critical reagents are well protected.

- ***Leakproof design***
- ***Small bottles are perfect for diagnostic reagents***
- ***Size range from 0.5 ml through 20 ml***
- ***Multiple materials available – durable, break resistant***
- ***Multiple packaging options to meet your requirements***

Packaging-Grade Bottles

Thermo Scientific Nalgene quality at an economical price for a wide range of packaging applications

Take advantage of quality construction at a lower gram weight and lower bottle cost for your bulk packaging needs. Multiple packaging options are available, including bulk packs and sterile containers, as well as tray packs to simplify your filling and processing operations.

- ***Same leakproof performance as all other Thermo Scientific Nalgene bottles***
- ***Lighter weight than standard lab quality bottles***
- ***Durable construction***
- ***30 ml through 1 L size***
- ***Narrow mouth and wide mouth round bottles***
- ***Sterile option available***
- ***HDPE (natural and amber), LDPE and autoclavable PPCO***
- ***Multiple packaging options***

PET & PETG Media Bottles

Thermo Scientific Nalgene Sterile Media bottles are the industry standard for containment of critical biological reagents

Our PET and PETG bottles are the industry leaders, and the economical choice of biotech companies worldwide.

- ***Leakproof design***
- ***Glass-clear for easy content viewing***
- ***Sterile: requires no additional cleaning***
- ***Tray packed for ease of use***
- ***Square shape saves significant space***
- ***ADCF bottle and closure resins***
- ***Excellent CO₂ and O₂ barrier***
- ***Septum closure available***

Specialty Bottles

Unique containers for a wide range of specialty applications

There's a quality Thermo Scientific Nalgene bottle for virtually any specialty or custom application you may have. From heavy wall bottles for waste traps to chemically inert Teflon® containers for valuable reagents – our specialty products offer cost-effective OEM solutions. Our IP2 containers comply with IATA/ICAO for inner packaging requirements.

Heavy-Wall Bottles

- **Leakproof design**
- **Excellent for use as reservoirs and waste containers for instrumentation**
- **Most durable bottle available**
- **1, 2, 4, and 5 liter sizes**
- **HDPE and autoclavable PPCO**
- **PPCO rated for vacuum use**

Heavy-Wall Bottles

- **Leakproof design**
- **Comply with 49CFR, IATA, ICAO for inner packaging**
- **Narrow and wide mouth**
- **Bulk pack**

Heavy-Wall Bottles

- **Leakproof design**
- **The most chemically inert plastic bottles available**
- **Sizes from 30 ml – 2 liter**
- **FEP and PFA bottle resins available**
- **Autoclavable**

invitro fertilization

Safety. Safety. Reproducibility.

Quality is the key to reliability. Thermo Scientific Nunc IVF products are rigorously tested, certified and produced under ISO 13485 to ensure maximum consistency and quality, with no lot-to-lot variability. From the collection of gametes to fertilization, maturation and embryo storage our line of IVF products helps to ensure optimal results at every stage of development, in and out of the lab.

Collection & Preparation

By emphasizing the quality and safety of products that contact gametes, including MEA and HSSA testing of consumables, we deliver highly reliable products for the collection and preparation of male and female gametes.

Embryo Fertilization, Maturation & Transfer

Achieve superior embryo growth during embryo fertilization, maturation and transfer with products that are engineered for superior handling and optimal heat transfer. Our products are certified medical devices for IVF in order to provide an extra guarantee of consistency and quality.

Gamete & Embryo Storage

You can optimize your frozen embryo transfer success rate with safe and convenient storage solutions, including cryopreservation – offering multiple chances to achieve pregnancy from a single oocyte retrieval cycle.

Testing results are available online for every lot at

www.thermoscientific.com/ivf

Thermo Scientific™ Owl Mini Gel Electrophoresis Systems

EasyCast B1A

- Perfect size to determine molecular weight ranges of PCR fragments or larger sized DNA molecules
- All in one design allows the option of casting and running a gel in the buffer chamber, eliminating the need for additional equipment. Two comb slots on gel tray double sample capacity by doubling number of sample wells
- UVT gel trays are silk screened with a florescent ruler for easy measurement of bands
- Feature leak proof casting that allows a gel to be cast and run in the same chamber with no tape or additional parts required
- Run from 5 to 24 samples in 15 minutes

EasyCast B1

- Offers a wide range of combs
- Two comb slots on gel tray double sample capacity by doubling number of sample wells

EasyCast B2

- Longer gel length and the 2 comb slots provide the flexibility of running 8 to 48 samples on 1 gel
- Optional multi load tray can increase the maximum number of samples to 108 in an 8 or 12 multichannel pipette format.
- 2 comb slots on the U.V. Transmissible (UVT) gel tray double sample capacity by doubling the number of sample wells

EasyCast B3 - with Built-In Recirculation

- Prevent the formation of pH and ionic gradients
- Do not require external pumps, tubing or stir bars, because recirculation system is built into buffer chamber
- Eliminate uneven migration, band distortion or disassociation of pH-dependent glyoxylated RNA molecules that can result when ionic depletion occurs

Thermo Scientific™ Owl Wide-horizontal Gel Electrophoresis Systems

D2 Wide-Gel

- Wide gel size allows 15 or 30 samples to be loaded per row with a micro well comb
- Using special combs and a multichannel pipetter, samples may be loaded directly from a 96-well plate, 8 or 12 at a time
- Excellent for screening PCR samples or routine DNA fragment analysis
- Incorporates EasyCast* casting design with external caster — gel tray is fitted with gasket, allowing it to fit snugly into caster and providing a leakproof seal without tape
- Electrode placement allows gel to be run quickly without compromising resolution

D3-14 Horizontal

- System screens 25 to 200 samples on a single agarose gel in less than 30 minutes.
- With special combs and a multichannel pipetter, samples are loaded directly from a 96-well plate, 8 or 12 at a time
- Sample loading with multichannel pipetter speeds up transfer
- Bubble level ensures casting of flat, uniformly thick gels

A6 Horizontal

- System screens 25 to 500 samples on a single agarose gel, producing clear.
- Gel tray's unique comb-slot design allows use of up to 10 evenly spaced combs
- With special combs and a multichannel pipetter, samples are loaded directly from a 96-well plate, 8 or 12 at a time

Thermo Scientific™ Owl Large-Gel Electrophoresis System

A3-1 Large-Gel

- Horizontal system can run from 25 to 600 samples on one gel
- Gel can be cast in varying lengths to help conserve agarose when fewer samples need to be run
- Built-in buffer exchange ports allow for buffer recirculation on extended runs
- UVT gel tray has gasketed end gates for leakproof seal without tape
- Built-in leveling ensures flat, uniformly thick gels
- Large number of comb slots provides sample number and resolving distance flexibility
- Microwell-format combs provide fast, error-free sample loading with a multichannel pipetter
- Samples may be loaded directly from a 96-well plate, 8 or 12 at a time

A1 Large

- Optional built-in buffer exchange ports allow for buffer recirculation on extended runs
- Programmable power inverter may be used for field reversal electrophoresis
- Comb slots allow two, three or four sample sets of equal lengths to be run on the same gel

A2 Large

- Additionally offers the greatest variety of comb options

A5 Large

- Prevent the formation of pH and ionic gradients
- Do not require external pumps, tubing or stir bars, because recirculation system is built into buffer chamber
- Eliminate uneven migration, band distortion or disassociation of pH-dependent glyoxylated RNA molecules that can result when ionic depletion occurs

Owl A2-OK Multiple Gel Electrophoresis System

- Up to six 7 x 8cm minigels can be run on one system
- Screen up to 120 samples at once with supplied combs
- EasyCast* casting design permits casting without tape or plugs
- UV-transmissible (UVT) gel trays may be placed directly on the transilluminator for easy photo documentation
- Teacher can instruct up to 12 students using one system and one power supply

Thermo Scientific™ Owl D4 Horizontal Electrophoresis System

- Designed to provide flat, even banding patterns and consistent results with hassle-free gel casting — no tape, grease, agarose seals, or other accessories are required
- Run one gel tray (51 samples) in the buffer chamber, or to save bench space, two stacked trays (102 samples)
- Two 16 x 17cm UV Transmissible (UVT) gel trays accommodate up to three combs each, allowing the user to run up to three series of samples equal distances
- Stand-alone casting platform included for casting two gels simultaneously
- A single gel can be cast right in the buffer chamber or in the external caster

Thermo Scientific™ Owl P81 Single-Sided Vertical Electrophoresis System

- Simple, rugged system provides excellent results
- Upper buffer chamber extends the length of the gel to distribute heat evenly across the entire gel surface
- Side clamps press glass plates against silicone gasket to provide uniform pressure and form a leakproof seal resulting in flat, even banding patterns
- Notched alumina ceramic plate (included) may be used in front of notched glass for cooler, faster runs

Cat. No.	Vertical System	Gel Size (L × W)	Footprint (L × W × H)	Running Buffer Volume			Price ₹
				Upper Buffer	Lower Buffer	Total Buffer

P81	Single Sided	10 × 10cm	18 × 8 × 13cm (7.1 × 3.1 × 5.1in.)	100mL	50mL	150mL	75018

Thermo Scientific™ Owl Dual-Gel Electrophoresis System

P82

- Runs two 10 x 10cm gels or one gel when used with blocking plate; accommodates 8 x 10cm gels utilizing the provided adapter
- Allows gels to easily be placed into the device
- Wedge placed in front of the cassettes provides even pressure against the leakproof gasket, places the cassettes in proper running position
- Two sizes of wedges accommodate varying thickness of precast gels
- Flexible — use precast polyacrylamide gels or hand cast gels
- No cooling required

Cat. No.	Vertical System	Gel Size (L × W)	Footprint (L × W × H)	Running Buffer Volume			Price ₹

P8DS, P9DS

- Quickly and easily casts and runs 1 or 2 gels in the same device
- Perfect tool for second dimension protocols of 2-D electrophoresis, SDS and agarose gels, and native PAGE electrophoresis
- Unique agarose plug method makes casting gel simple and quick. Gel assemblies do not have to be moved once set-up. Two individual steps of casting and running in different devices are now combined. Simply secure the glass cassettes, pour the agarose plug in the specially designed trough, cast polyacrylamide solution in the cassettes, load samples, and run the gel. Manufactured using a time-tested acrylic fabrication technology, providing a durable, long-lasting system
- Central cooling core provides even cooling across the gel surface for outstanding resolution and clear banding
- Cooling is achieved by circulating fluid through the core with external circulator or cool tap water

P10DS

- Optimal device for a large number of samples that need extended separation and mobility shift assays
- Casts and runs one or two 20 × 20cm gels in the upper buffer chamber
- Larger size cassette gives the maximum number of samples and separation length

Thermo Scientific™ Owl Power Supply

EC-105 Compact

- Equipped with an over current detector for maximum safety
- Easy-to-use power supply operates in constant voltage
- The adjustment knob and hi-lo range switch control the output, which is variable in 10V increments from 20V to 250V
- Two-position switch toggles the bright LED display from indicating output voltage to output current
- The supply is also equipped with an over current detector for maximum safety and has two jacks

Cat. No.	Maximum Voltage	Max. Current	No. of Jacks	Display Modes	L × W × H	Electrical	Price ₹
EC-105 Compact							
105ECA-LVD	250V	300mA @ 150-250V; 500mA below 150V	1	Voltage or current	15 × 20 × 11cm (6 × 8 × 4.5in.)	230V 50/60Hz	60532

EC-300XL2 Compact , EC-200XL High Current

- Power-off memory retains settings after shut-down
- Stackable design saves benchtop space
- Soft-touch key pad allows quick set-up
- Designed for safety
- Non-skid rubber feet provide stability

**EC-1000XL, EC-3000XL Programmable**

6240	Shake 'n' Stack Hybridization Ovens, includes Shaker platform, 10-bottle capacity rotisserie, adjustable feet, drip tray, manual	403362

The most compact unit of the Heratherm microbiological incubator family has an 18L capacity, ideal for personalized workspace.

From simple drying of glassware to the most complex and carefully controlled heating applications, your oven is an invaluable part of your daily work. The Heratherm oven range includes an array of solutions to match your needs.

Unlike conventional incubators, the BK 6160 cooling testing chamber is designed to prevent dehumidification, achieving up to 90% relative humidity with the addition of an internal water pan.

Thermo Scientific Shake 'n' Stack Hybridization Ovens are stackable, space-saving and have excellent uniformity which are ideal for molecular biology labs

Designed with safety in mind, Thermo Scientific™ furnaces offer temperature ranges from 1100°C to 1700°C. Light gauge overbend* (LGO) heating elements are designed to keep samples safe while maintaining reliable temperature uniformity.

Vacuum Ovens for basic drying, curing, outgassing, aging, process control and other applications requiring elevated temperature in reduced atmospheres or vacuum/purge with nonflammable and inert atmospheres

Thermo Scientific™ Rockers Rotators & Mixers

Bottle/Tube Roller
(2 units depicted with stacking kit)

Thermo Scientific™ Savant DNA SpeedVac® Concentrators

Offer a dependable line of concentrators designed specifically for DNA and RNA applications. These compact, fully-integrated systems support the rapid and efficient concentration and drying of DNA/RNA samples, nucleic acids, PCR preps and synthetic oligos.

Details

Thermo Scientific™ Savant™ DNA SpeedVac Concentrators ensure sample safety and reproducibility for your key DNA protocols:

- Drying down DNA/RNA precipitates in microplates or microtubes
- Drying down PCR samples in water/ethanol or isopropanol
- Drying down oligonucleotides

With three models to choose from, the Savant™ DNA SpeedVac concentrators can easily support your low-volume small quantity sample preparation research needs as well as your high-volume processing requirements.

Cat. No.	Description	Price ₹
DNA120-230	DNA120 concentrator with integrated pump includes RD36 rotor	POR
DNA1200P-230	DNA120 concentrator with integrated pump for Oligos includes RD36 rotor	POR

POR = Price on Request

For more than 45 years, the Savant SpeedVac® name has been recognized by scientific researchers and laboratory personnel around the world for delivering value, reliability, and performance in centrifugal vacuum concentration.

OLIGOS

The Savant™ DNA 1200P SpeedVac concentrator, for use with oligos, includes a chemically resistant glass cover and external post trap for drying down synthetic oligos with ammonium hydroxide preparations.

HIGH VOLUME

The high-capacity Savant™ ISS110 DNA SpeedVac concentrator – with a built-in 4-liter cold trap – is ideal for processing large batches of DNA/RNA samples. To accelerate evaporation, you can preheat the chamber – then turn the heater off prior to starting the run.

SMALL VOLUME

The Savant™ DNA120 SpeedVac concentrator offers rapid and efficient drying of small-volume DNA/ RNA samples. The unit offers three drying rates (ambient, ~43°C, ~65°C) and includes dual digital timers for independent control of heat and run times.

Thermo Scientific™ Drybaths / Block Heaters

Digital Cooling Dry Bath

Blocks for cooling dry bath

Digital Shaking Dry Bath

Touch Screen Dry Bath

Blocks for Touch Screen Dry Bath

Reliability you can depend on. Thermo Scientific™ versatile dry baths / block heaters offer a wide range of blocks to accommodate various tubes. Available with digital, shaking or touch screen controls, **our units provide outstanding temperature uniformity and stability** that help create the reproducible results that you need.

Maximize valuable bench space with our **compact, light weight** dry bath / block heater, available with multiple combinations of block sizes for tube size versatility.

Thermo Scientific™ MaxQ™ Shaker

Our cutting-edge orbital shaker designs provide reliable around-the-clock operation ideally suited to keep your cells alive and flourishing within your working environment. Delivering reliability, simplicity and flexibility, our orbital shakers are easy to operate with a wide range of shaker options including analog or digital, incubated or refrigerated and benchtop or floor model, we make it easy to choose the right shaker solution for your laboratory.

Thermo Scientific™ Hot Plate Stirrers & Magnetic Stirrers

Offer a wide variety of models and sizes to help maximize your experimental procedures. This extensive line allows you to select from basic stirrers, perfect for non critical stirring applications to more advanced, digital stirring hotplates where temperature and stirring accuracy are critical for success.

Quality you demand, value you appreciate

Our ultrasonic bath series provides an ideal support for all applications in analytical, medical laboratories and industrial production. The units are easy to operate with a clearly arranged display showing all set and actual parameters. Several special features do make the units perfect for intensive cleaning applications or laboratory applications.

FB65460

Two-Stage Direct Driven Rotary Vane Pumps

Vacuum Systems

The FB65500 is the perfect system for evaporation and distillation in combination with rotary evaporators and gel dryers. The dry running diaphragm pump and all components coming into contact with vapours are chemically resistant even against acidic, basic and organic solvents

Design Features

- Vapor recovery system**
protects lab air quality
- Digital vacuum display**
for easy and precise vacuum readout
- Vacuum Regulator**
regulated effective ultimate pressure
- Gas ballast valve**
helps to preserve pump performance
- Separator/liquid trap**
protects pump from liquid entering into the pump
- Chemical duty diaphragm pump**
fast stripping of most common solvents

Fisher Scientific™ Sonic Dismembrators

Model 705

Model 505

Fisher Scientific offers a full line of Sonic Dismembrators with a variety of features and accessories to handle virtually any liquid processing application.

Applications Include :

- Cell disruption
- Homogenization
- ChIP/DNA shearing
- Nanoparticle dispersion
- Protein extraction
- Sonochemistry
- Soil extraction
- Mixing

Fisherbrand® Balances

Series of balances and weighing accessories

Precision series

An excellent balance for routine weighing in general laboratory, industrial and education applications

Moisture series

Fast, easy to use, compact analyser

Analytical series

Designed to meet everyday weighing needs

Compact series

Economical, dependable and portable

Portable series

Superior performance in an affordable, portable balance

mySPIN™ 12 mini centrifuge

- Compact design
- Easy to operate
- Quiet operation, low vibration
- Tool-free, quick rotor exchange
- Quick-spin feature
- Safety features: imbalance and tilt safety cut-out; safety interlock lid prevents opening while rotor is turning
- Able to perform fast spins with higher RCF requirements up to 9,800 x g
- Back-lit, customizable display can be set for rpm or RCF

mySPIN™ 6 mini centrifuge

- Compact design
- Easy to operate
- Quiet operation, low vibration
- Tool-free, quick rotor exchange
- Tool-free, quick rotor exchange
- Quick-spin feature
- Safety features: unit will not operate without lid in place
- Quick tube extraction

Packed with possibilities, the Thermo Scientific™ mySPIN™ 12 mini centrifuge is designed to give you maximum speed and flexibility in a minimized footprint.

Its compact, ergonomic design fits on any workstation and is comfortable and easy for anyone to operate. Safety features help ensure it will not operate when the lid is open, a rotor is jammed, or the unit is out of balance. Ideal for most protocols requiring fast spins (12,500 rpm / 9,800 x g), and appropriate for PCR, microfilter cell separation, and HPLC protocols.

Bring efficiency and user comfort to your lab stations with the Thermo Scientific™ mySPIN™ 6 mini centrifuge. Ergonomic design, tool-free rotors, and quick-spin options make it fast and easy to use. Efficient, compact footprint fits into a variety of workstations. Ideal for microfilter cell separations and HPLC samples, with adapters to accommodate all major microtube and PCR tube styles (2.0, 1.5, 0.5, 0.2 mL) for customized use.

CENTRIFUGATION

Thermo Scientific™ Microcentrifuge Series combines power, versatility and convenience in a safe, compact, easy-to-use lab instrument. Available in both ventilated and refrigerated models, the microcentrifuge is designed to accelerate your routine sample preparation processes by providing high speed and generous capacity along with outstanding safety and convenience.

Details

- **Unique ClickSeal biocontainment rotor** lid “clicks” in place, providing certified assurance that samples are securely contained, and with one click opening, shortens retrieval time compared to screw-on lids
- **24 spin columns in standard rotor**
- **Intuitive controls and easy-to-read display simplifies operation**
- **Unique dual row rotor** holds 18 x 1.5/2.0mL and 18 x 0.5mL tubes, eliminating the need for adapters
- **Wide range of rotors for future upgrade**
- Conforms to the latest clinical and safety standards, including **In Vitro Diagnostics (IVD) compliance**
- **Faster processing times** offer unmatched acceleration and deceleration rates
- **Ideal for PCR, mini-preps, spin-columns**
